

Environmental Awareness Training

This training focuses on the ways each individual can improve their own environment by looking at the consequences of their actions. Students will understand that keeping the environment clean is not only a personal responsibility, but more importantly, it's the law.

- Rich multimedia presentation with interactions and quiz
- Print certificate and wallet card
- You have 60 days to complete the course
- CEUs awarded

Audience

Training for all workers.

Topics

The course presents the following topical areas:

- Personal Responsibility
 - Everyone can help
- Identifying Hazardous Waste
 - Ignitable waste
 - Corrosive waste
 - Reactive waste
 - Toxic waste
 - EPA hazardous waste list
- Handling and Storage
 - Small and large quantity generators
 - Handling and storage rules
- Protecting The Water
 - Surface and groundwater pollution
- Emergency Response and Reporting
 - Reporting an incident

Intended Learning Outcomes

Upon successful completion of this course you will be better prepared to:

- Follow personal practices that help protect the environment.
 - Identify three items that can be disposed of as ordinary municipal waste.
 - Identify good behaviors that help protect the environment.

- Properly identify hazardous waste.
 - Identify ignitable wastes.
 - Identify reactive waste.
 - Identify corrosive waste.
 - Identify toxic waste.
- Properly handle and store hazardous wastes.
 - Describe a hazardous waste manifest.
 - List days of storage allowed for small quantity generators.
 - List days of storage allowed for large quantity generators.
 - List proper storage practices.
 - Recognize importance of grounding containers.
- Identify potential water pollution.
 - Identify stormwater runoff.
 - Define groundwater pollution.
 - Define surface water pollution.
- Comply with spill reporting requirements.
 - Identify the reporting requirements for large chemical spills.
 - Identify the reporting requirements for hazardous spills into waterways.
