

Asbestos Awareness Training

In this asbestos awareness training course, your students will learn about the hazards of working around materials that contain asbestos. This course will teach your students how to limit their exposure to asbestos and steps to take to protect their safety. It provides the majority of the training to meet the OSHA regulation for Class IV workers.

OSHA REGULATION: 29 CFR 1910.1001.

Rich multimedia presentation with interactions and quiz

Print certificate and wallet card

You have 60 days to complete the course

Audience

For employees who may come into contact with materials containing asbestos in their workplace.

Topics

- The course presents the following topical areas:
- Introduction To Asbestos Awareness
